# Success which comes with experience!

The story of **eveluxusa** begins in 1988, when The Yukselen family established their business 26 years ago producing die injection molds.

The company always had an innovative and creative soul, and provided several different items for the market.

## Focused Developing Strategy

After considering service requirements in its field, beginning in 2000 the company decided to specialize and expand in Traffic Safety Equipment field and devote our expertise to this market.

## Establishment and Sales Network

By the way of technological investment in 33,500 yd2 facility, now the company is implementing the mass production of Traffic Safety Products. Completed the sales network of agents throughout Europe, Africa and UAE. The Company is doing export via **evelux** brand to Europe, based in Germany, Middle East and Africa based in UAE and now with **eveluxusa** **Arbel Strauss** to the US market.

## Leading the Market

The ever increasing traffic is life threatening to drivers and pedestrians. Therefore, it is increasing the number of precautions to provide traffic safety products. We, as **eveluxusa** are producing traffic safety equipment with our continuing R&D studies.

## General Application Fields

- Highways
- Roads
- Crossings
- Road Maintenance
- Construction Areas
- School Zones
- All Parking lots
- Industrial areas

## Excellent Quality for All Conditions

With the need for high level endurance for all conditions, **eveluxusa** products are capable of all terms of standardization, by high quality production and material.
So **eveluxusa** items are used in all fields of traffic safety in the most difficult conditions.

## Confirmed Quality

Innovations under condition of EN 13422 Europe standardization make EVELUX successful in international markets

- Long LifePlastic Material
- Resistance to natural weather condition
- UV Resistance
- Resistance to friction
- High quality reflective sheeting and lenses
- Easy Installation and Endurance

## Customer Relations

**eveluxusa** presents its product range and service to their distributers and end users to have diversity with high quality. We are producing brand new items which are technically high level.

## Close to Local Markets

Being close to market is a determining factor for success. With our capable partners in the most important export markets and agent network in Europe, Africa and UAE, we carry on our efficiency in local markets and contact with our customers by the most efficent way.

## Delivery from Ready Stocks

Evelux delivers the orders to customers from stocks on time! This warrants trust and time saving to its customers.
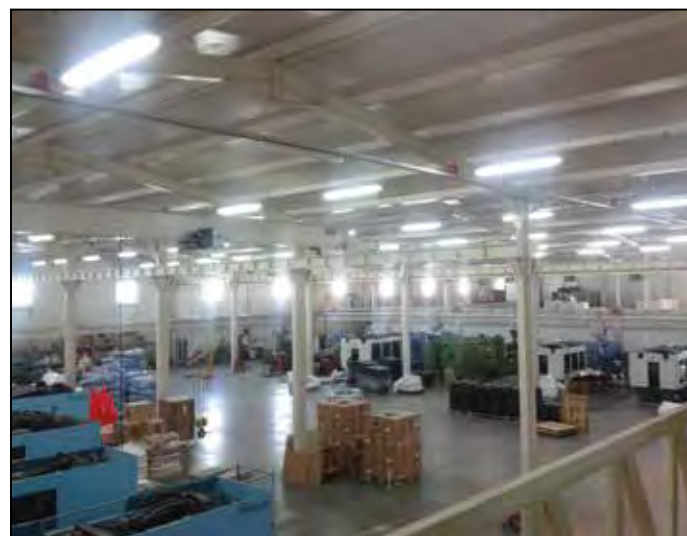

## Fast and Effective

To make a fast and effective product, **eveluxusa** has a series of high tech injection machines and automated production line. Production is supplied by high pressure injection molding techniques.

**eveluxusa** products stand out together with its professional management process and high quality operation.
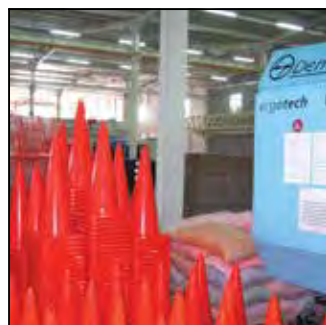

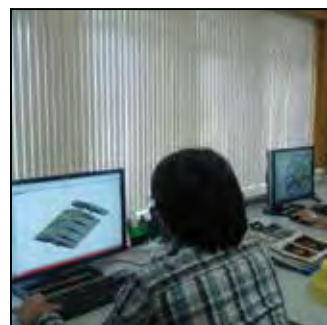

## Quality for Trust

By continuing the high quality of our products, we indeed confirm to distributers our leadership in the market.

All Evelux production areas are completely complaint by DIN ISO 9001:2008.

Also to increase the quality of our products, we will continue investing in production, R&D and education of our team.

## Solar Powered LED Barricade Flasher and Signs

- Solar charged battery and LED flashers.

- Cost and energy saving efficient warning.

- Continuous warning with LEDs, reflective sheeted corners and cat eyes circumference in standard lamps and reflective ring in button lamps.

- Can be switched on/off to save battery energy.

- Solar LED signs can be customed design upon requested.

- Premium quality lens surfaces and covers.

- Can be attached to Evelux Delineator adaptor, Cone adaptor, Delineator Marker Posts, Traffic Channelizer Posts, Traffic Control Barricades and Safety Barriers with Vertical Panels

- Wide range of use on road working areas, building areas and hazardous areas.

- The solar panel can be swiveled 3600 or tilted 450.

- The LED sign can be attached to U Channel posts as well as 2"-2.5" / (50-75mm) post.

- Operating temperature range -40F to + 140F

## Bi-directional Solar powered LED Barricade Flasher

PARKING →

## Speed Bumps and Mini Humps

- Effective speed restrictive height size: 1.57"- 1.96" mm vs. 6 to 31 mph.

- Made from PVC compound and PPC polymer.

- Strong resistances to warping and embedding in asphalt due to vehicle impacts. High durability, will not crack, warp, chip or rot, Resistant to UV sunlight, oil, salt, extreme temperatures and moisture.

- Rounded edges to prevent damage to vehicle tires and components.

- Different speed restriction is designed with different warning features.

- Available in yellow and black colors.

- Efficient and continuous warning with yellow retro-reflective tape, cat eyes and retro-reflective lenses.

- Better visibility during daytime and night.

- Mainly applied on streets where speed must be restricted, especially schools and restricted crossings, junctions, shopping malls, hospital exits, blind spots, pedestrian zones, etc.

- Operating temperature range -4$^0$ F to + 14$^0$F

## Polyurethane Flexible Delineator Posts and Permanent Bollards

- Delineator posts are designed with a reactive spring design and made from flexible Polyurethane to give with impact and rebound towards traffic.

- Warning effect can be enhanced by attaching barricade flashers and sign boards on top of posts.

- Permanent Bollards designed to prevent vehicles from parking in restricted areas.

- Permanent Bollards made from durable materials have a visual effect with esthetic appearance, reflective sheeting and different colors.

- When Flexible Delineator Posts and Permanent Bollards are damaged, they can be exchanged easily.

- Easily fixed on to the ground with epoxy gluing or screwing.

- Operating temperature range -40F to + 140F

## Traffic Safety Cones

- Highly visible reflective sheeting.

- Broad angled and weighted bases provide wind resistance and stability.

- Stackable design to minimize taking up space.

- Manufactured from PVC material gives solid and durable features and provides a longer life for continuous outdoor usage. Bright orange color and reflective sheeting make them highly visible.

- PVC cones have flexible and unbroken features. Best for work areas and dense traffic. UV protected bright orange color provides better visibility and long life color fading.

- Operating temperature range -4$^0$F to + 14$^0$F

## Delineator Markers, Traffic Channelizers, Barricades, Barriers and Vertical Panels

- Delineator Markers and Traffic Channelizers are available in different heights, weights and colors.

- Evelux Barricade flashers, sign boards and accessories can be attached.

- Chain hole features provide a functional use to control dense traffic efficiently and crowd control.

- High quality materials keep the products maintenance free.

- Traffic Control Barricades and Safety Barriers with Vertical Panels are equipped with foldable feet and handles to provide easy carrying and storage.

- Weighted base for maximum stability.

- Customized panel graphics available on request

- Delineator Markers and Traffic Channelizers Posts are an efficient solution for crowd guidance and traffic control.

- Operating temperature range -4$^0$F to + 14$^0$F

## Traffic Lane Channelizers, Parking Curbs, Corner Guards and Convex Mirror

- Delineator posts and flaps are designed with a reactive spring and made from flexible material to give with impact and rebound towards traffic.

- When posts and flaps are damaged, they can be exchanged easily with their spare parts.

- Effective and continuous warning with reflective sheeting, lenses, cat eyes and bright colors.

- Warning effect can be enhanced by attaching Evelux barricade flashers and sign boards on top of posts.

- Parking Curbs with reflective material are effective during parking.

- Corner guide with its bright color, elastic cushions and reflective rings is best for closed car parks to prevent accidental crushing.

- Convex mirror is the best solution to help drivers and road users to see behind blind spots

- Convex mirrors with its functional installation parts have $45^0$ movement up and down as well as side to side.

- Convex mirrors installation parts are designed as a hinge. With additional installation parts it's possible to install on a pole or directly on the wall.

- Convex mirror is made of durable acrylic plastic material.

- Operating temperature range $-4^0$F to $+ 14^0$F
